

Management Information System

Study Guide

- “Ordinary” OS Files
- Advantages of Objects
- Apache HTTP Server
- Characteristics of Data Quality
- Closed Shops
- Computer Based Information System
- Data Analysis Report
- Data Cleanup
- Data Dictionary
- Data Flow Diagram
- Data Modeling
- Data Redundancy
- Deterrence Controls
- Effective Interfaces
- File Management
- Firewall Wireless Networks
- HTML vs. DHTML vs. XML
- Indicators
- Management Information System
- Non-CGI Gateway
- Non-Spatial Data
- Object Oriented Data Models
- Object Privileges
- Object-Oriented Software Approach
- Object-Oriented System Investigation
- Parts of a Database
- Parts of the Expert System
- Performance Goals
- Physical Database Design
- Primary Key
- Process Modeling
- Recursive Relationship
- Relational Table
- Schema
- SDLC Project
- Security
- Steps of the System Development Process
- Steps to Database Design
- System Analysis
- System Analysis Team
- System Controls
- System Design
- System Design Team
- System Development
- System Software
- System-Level Security
- Types of Architecture
- Types of Charts
- Types of Loops
- Types Operating Systems
- Virtual Memory
